General Information, Identity & Leadership

Voltaris Mobility N.V. • Amsterdam, Netherlands • Founded 2016

“Drive the Current.”

About Voltaris Mobility

Voltaris Mobility N.V. is a global electric-vehicle manufacturer and autonomous-mobility company headquartered in Amsterdam, Netherlands. Founded in March 2016 by Dr. Elena Vasquez and a small team of battery engineers and software researchers, Voltaris was created on a single conviction: that the car of the future would be electric, intelligent, and shared. From a 40-person workshop in the Zuidas business district, the company has grown into one of the most recognised names in clean transportation, employing 38,400 people across four continents and delivering 612,000 vehicles in the 2025 financial year.

The company designs, manufactures and sells a full range of battery-electric vehicles, from compact city cars to a luxury flagship sedan, and operates an autonomous robotaxi service branded Voltaris Go. Every Voltaris vehicle is built on the company's in-house VoltCell solid-state battery platform and ships with the Halo driver-assistance and autonomy system. Voltaris is publicly listed and reported revenue of \$24.6 billion in FY2025.

Brand & Logo

The Voltaris brand mark is a deep-navy disc containing a cyan lightning bolt shaped to suggest the letter 'V'. Navy represents trust and engineering rigour, while the cyan bolt signals energy, electricity and forward motion. The wordmark is set in a clean geometric sans-serif. The official brand promise and tagline is "Drive the Current." Brand colours are Voltaris Navy (#0A1A2F), Current Blue (#0B5FFF) and Charge Cyan (#00D8C2).

Headquarters & Global Offices

Voltaris' global headquarters occupies the Voltaris Tower in Amsterdam's Zuidas district. Beyond the head office, the company runs major hubs that each anchor a different part of the business:

Location	Role	Approx. Staff
Amsterdam, Netherlands	Global headquarters, design	6,200
Austin, United States	North American manufacturing	9,800
Shenzhen, China	Asia manufacturing & supply chain	11,400
Bengaluru, India	AI and autonomy R&D centre	5,600
Rotterdam, Netherlands	Battery (VoltCell) gigafactory	5,400

Leadership Team

Voltaris is led by an executive team combining automotive, software and finance backgrounds:

- **Dr. Elena Vasquez** — Founder & Chief Executive Officer. A battery physicist by training, she has led the company since inception.
- **Rajiv Menon** — Chief Technology Officer, responsible for the Halo autonomy stack and the VaxCore compute platform.

- **Marcus Lindqvist** — Chief Financial Officer, overseeing the company's path to sustained profitability.
- **Aisha Okonkwo** — Chief Operating Officer, responsible for global manufacturing and the VoltGrid charging network.
- **Sofia Reyes** — Chief Design Officer, leading the studio behind the Pulse, Aero, Atlas and Orion model families.

Workforce

Of the 38,400 employees, roughly 41% work in manufacturing and operations, 28% in engineering and software, 12% in research, and the remainder across commercial, retail and corporate functions. The company reports a voluntary attrition rate of 7.2% and has set a target of full gender parity in engineering roles by 2030. Voltaris operates an employee share-ownership scheme covering all permanent staff.

Mission

Voltaris' stated mission is “to make clean, autonomous mobility the default choice for every person and every city.” The company frames its work around three pillars: electrification of the drivetrain, intelligence in the vehicle, and access through shared autonomous fleets.
